## Boston Global Forum and United Nations Academic Impact Initiative

*Remaking the world – The Age of Global Enlightenment.*

The United Nations Centennial was launched in 2019 by the *United Nations Academic Impact* in partnership with The Boston Global Forum.

The UN Centennial programs host roundtable discussions, conferences, new concepts, solutions, think pieces, and reflections as we look ahead to the global landscape in 2045—the United Nations Centennial year.

This initiative will examine issues impacting technology, including artificial intelligence, cybersecurity, diplomacy, warfare, and other pressing concerns. Our goal is to look to the future and the role the United Nations will continue to play in making our world more peaceful, democratic, prosperous and universally secure.

The Boston Global Forum contributes AI World Society initiative to the United Nations Centennial.
